## EDUCATION

### Bachelor of Science in Computer Science

University of Arkansas, Fayetteville, AR | GPA 3.93

Expected: May 2027

## WORK EXPERIENCE

### Software Development Intern

September 2022 – April 2025

*Aps Data Technologies*

- Lead programmer on large project that deals with using Neural Networks in Python for tracking cars and detecting if they are parked or not. Increased time efficiency by ~50% to help with Real Time performance
- Released a Smart City mobile app where I wrote 20% of the code and created my own widget for the release in production
- Worked on Smart City Mobile App that deals with API calls for Broadway in Aurora Illinois in React Native. Handmade calendar widget to display API results utilizing datetime calculations
- Fixed a broken custom API on Google Cloud Platform that was non-functional to integrate with our app's parking reservation systems, redeploying it successfully with 100% of intended functionalities
- Made a parking companion widget where I wrote 75% of the code, integrating it with Firestore for a smooth user experience to reserve parking spaces on a google maps view of a parking lot using APIs and Firebase Authentication

### Assisting Intern Manager

June 2024 – September 2024

*Aps Data Technologies*

- Assisted in managing a group of 4 interns over the summer to build 2 apps
- Delegated tasks, organized meetings, did training and program help when needed

### Lead Developer

April 2025 – Present

*Aps Data Technologies*

- Led and creates C++ and Python system to use Machine Learning to identify, read, reference to database, and display License Plates using an LED Screen on a Raspberry PI.
- Using the Smart City App I managed my teams for, modified 3 separate apps for different cities in the UK to present via sending the APK and through demo videos according to their needs
- Managed a team of 12+ interns, overseeing work, code, ensuring apt progress for our projects. Team produced 6+ key widgets for our Generalized Smart City mobile app
- Played a Key Role in maintenance on our main code base for our Generalized Smart City App, where I was to refactor our styling, accept pull requests, and fix the occasional bug or UI issue
- Gained lots of skills in reading other's code, teaching, training, assigning tasks, working with other managers, delegation of management, and communication skills

## SKILLS

**Languages:** C#, C++, Java, Python, JavaScript, HTML/CSS

**Frameworks:** React Native, Tailwind CSS

**Technical Skills:** Git, Google Cloud Platform, VS Code, Computer Vision, Machine Learning, Firestore

**Soft Skills:** Project Management, Team Leadership, Agile Development

## CERTIFICATION/HONORS

### Dean's List

Fall 2023, Spring 2024, Spring 2025

### Engineering Career Awareness Program (ECAP)

Fall 2023 - Present

- A nationally recognized competitive program designed to promote the success of underrepresented engineering students
